Promoting Inquiry-Based Science Education
with online labs in schools

This project has received funding
from the European Union's Horizon
2020 research and innovation
programme under grant agreement
No 731685.

Project

Next-Lab stands for Next Generation Stakeholders and Next Level Ecosystem for Collaborative Science Education with Online Labs.

Next-Lab is an innovation project uniting 12 consortium partners from 12 European countries. Next-Lab continues the Go-Lab initiative and its mission of promoting Inquiry-Based Science Education with online labs in schools.

Next-Lab is for pre-service and in-service science teachers from 30 European countries, offering national and international training workshops and summer schools. Furthermore, teachers can benefit from the personal online support offered by Next-Lab.

Platform

The Sharing and Authoring Platform provides access to online science labs, inquiry learning apps, and 21st century skills apps to accommodate learning needs of students from 6 to 18 years old.

Teachers can choose from a large number of ready-to-use Inquiry Learning Spaces (ILSs) and adapt them to their lessons plans. Furthermore, they can create their own ILSs by assembling learning tools and resources of their choice.
