

GO-LAB

Learning by Inquiry – www.golabz.eu

Global

Scientific laboratories located all over the world can be accessed by students from any country to conduct personalized experiments

Online

High-tech scientific facilities can be used remotely: to control a robot or a telescope, study chemical reactions or biological processes

Science

Students can gain hands-on experience in any science: Astronomy, Physics, Electronics, Mathematics, Chemistry, Biology, and others

Labs

Using remote and virtual labs, you can extend your classroom activities with appealing demonstrations and experiments
